DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Demolina et al.

Demolina et al. discloses a gas spring comprising a tube, a piston, wherein the passages connecting first and second spaces occupy an area which is greater than 5% of the area of the piston, the area of the piston being the difference between the cross-sectional areas of the cylindrical chamber and the piston rod, in order to reduce the amount of heat generated in the gas spring.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Shinata, Thyssen and Deferme teach similar springs.
